

TELUS Health Virtual Care: How it works.

You now have access to TELUS Health Virtual Care. Our team of healthcare professionals are ready to assist you at anytime, anywhere in Canada. Connect immediately with a compassionate healthcare professional, right from your smartphone desktop, or tablet.

How it works

1. Start a consult

Click this button anytime you need medical support. You'll be connected directly to a healthcare professional.

2. Past consults

This tab contains transcripts of all of your text conversations with our healthcare team. You can refer back to them whenever you need.

3. Medical notes

The History tab allows you to look back on notes left by the healthcare professionals after your consult.

4. Profile tab

This is where you can set up your personal profile and invite your partner to have their own account or set up an account for your kid(s) (under 26).
